

Grading Revisions

Week One

R Basics Quiz #1, Question #10

Issue: Question unclear as it did not make its connection to the earlier question explicit.

Revision: We have removed the point value for this question.

R Basics Quiz #3, Question #4 – 6

Issue: Answers coded incorrectly

Revision: We corrected the answer key and re-scored student answers. If you attempted this question prior to **Wednesday, November 5**, you may need to re-enter your answers to the questions in order to receive credit.

Week Five

Analyze the Data Lab, Question #2

Issue: Answers coded incorrectly

Revision: We corrected the answer key, removed the point value for this question, and increased the submissions from one attempt to two attempts. If you attempted this question prior to **Wednesday, December 3**, you may need to re-enter your answers to the questions in order to receive credit.

Week Six

Solving for "T" Comprehension Check, Question #1c

Issue: Answer coded incorrectly

Revision: We corrected the answer key and removed the point value for this question. If you attempted this question prior to **Wednesday, December 10**, you may need to re-enter your answers to the questions in order to receive credit.

Analyze the Data Lab, Questions #2a – #2d

Issue: Answers coded incorrectly

Revision: We corrected the answer key and removed the point values for the affected questions. See our full revisions below:

1. We changed the word percentage to **proportion** in the instructions.
2. We removed all point values for the questions affected by the error.
 - What is the **carrying capacity** in Denmark?
 - What is the **carrying capacity** in Belarus?
3. We added an additional submission to the remaining questions in this component so that those students who have already answered the question have the opportunity to resubmit their answers if necessary.
 - What is the value of **b** (the growth indicator) in Denmark?
 - What is the value of **b** (the growth indicator) in Belarus?

If you attempted this question prior to **Monday, December 15**, you may need to re-enter your answers to the questions in order to receive credit.

Week Seven

Analyze the Data Lab, Questions #3b

Issue: Answers coded incorrectly

Revisions: We corrected the answer key and increased the submissions from one attempt to two attempts. If you attempted this question prior to **Wednesday, December 17**, you may need to re-enter your answers to the questions in order to receive credit.
